Fruit d'un colloque international qui s'est tenu à Paris à la fin de 1995 et qui portait sur L'image de la France en Espagne pendant la première moitié du XIXe siècle, cet ouvrage réunit près d'une vingtaine de travaux de spécialistes, qui offrent au lecteur un large éventail de thèmes et de perspectives sur la question, puisqu'ils touchent à la presse, à la littérature, à l'historiographie, à l'art, aux idées politiques et sociales. Les diverses visions que les Espagnols du XIXe siècle ont. Cette publication présente et analyse les conclusions du premier exercice pilote de rapport dans le cadre de la Convention sur l'eau, réalisé en 2017. Les progrès réalisés dans la mise en œuvre de la Convention sont passés en revue et résumés, ainsi que l'identification des tendances significatives, des succès, des défis et des opportunités concernant la coopération transfrontalière dans le domaine de l'eau. Le mécanisme d'établissement de rapports au titre de la Convention a été formellement adopté (décision VII/2) par la Réunion des Parties à la Convention sur l'eau lors de sa septième session (Budapest, 17-19 novembre 2015). It is widely recognized that the degree of development of a science is given by the transition from a mainly descriptive stage to a more quantitative stage. In this transition, qualitative interpretations (conceptual models) are complemented with quantification (numerical models, both, deterministic and stochastic). This has been the main task of mathematical geoscientists during the last forty years - to establish new frontiers and new challenges in the study and understanding of the natural world. Mathematics of Planet Earth comprises the proceedings of the International Association for Mathematical Geosciences Conference (IAMG2013), held in Madrid from September 2-6, 2013. The Conference addresses researchers, professionals and students. The proceedings contain more than 150 original contributions and give a multidisciplinary vision of mathematical geosciences. Using a common framework

developed by a collaborative Harvard University and Brandeis University affiliated research team, this volume surveys and analyzes the strategic responses of national unions in Britain, France, Germany, Italy, and Spain to the last two decades of economic change. Also evaluated is the response of Sweden, long seen as the most successful variation of the European model, as well as EU level transnational unionism. The volume concludes with a reflection on new union positions and their implications, particularly on the question of what will happen to the "European model of society" as a consequence.

Annotation copyrighted by Book News, Inc., Portland, OR A collection of essays from scholars evaluating tourism as a means of simulating economic growth and fighting economic inequalities in poor countries. It takes a look at the successes and failures of tourism in this role, and considers why tourism as a catalyst for economic development can be a controversial device. Spain is different" was a favourite tourist board slogan of the Franco dictatorship. Is Spain still different? This volume provides an original series of analyses of how politics in democratic Spain has developed since the remarkable success of the transition to democracy. La eficacia en la asistencia sanitaria no puede quedar dissociada de la eficiencia en el empleo de los recursos escasos. Es una afirmación que todo el mundocomparte. Mientras el progreso técnico amplía sin cesar las posibilidades de la medicina, la economía pone un límite a su aplicación indiscriminada. El médico debe ser el verdadero protagonista de una nueva cultura de la gestión sanitaria y sus conocimientos científico-técnicos, aplicables a las enfermedades, deben complementarse con una gestión activa e inteligente para conseguir lo mejor para un mayor número de pacientes. En este contexto, la economía de la salud puede prestar un importante servicio a las empresas sanitarias, en una estrecha conexión entre la medicina y la economía. El autor de este libro ha sabido ofrecer en un lenguaje asequible para todos, el panorama de los nuevos modos en que se están afrontando los problemas sanitarios desde un punto de vista empresarial.

The United Nations Convention on the Law of the Sea of 10 December 1982 entered into force on 16 November 1994. Since this date a single binding instrument has regulated the rights and duties of States at sea and regarding the sea. New concepts, such as the exclusive economic zone, archipelagic waters, transit passage through straits, and the International Seabed Area, are now fully recognized. The fifteen member States of the European Union are a significant sample for analyzing the practice of States, or at least that of the Western industrialized States, as regards the law of the sea. They include major and small maritime powers, coastal and land-locked States, States with coasts on the Atlantic Ocean and States with coasts on semi-enclosed seas such as the Baltic and the Mediterranean, States with and without involvement in deep seabed mining and States with different interests as regards fisheries. The fact that they all belong to the European Union is a very important common feature, which amply justifies the choice made to study them together. The book's aim is to give, through essays prepared by well-known specialists, a detailed survey of the attitudes and practice concerning the law of the sea of the member States of the European Union and of the European Community as such. The common positions of the member States and the results of their coordinated action also emerge from these essays. The fact that the member States and the European Community are now actively engaged in the process of becoming parties to the Law of the Sea Convention is certainly a major contribution to the consolidation of the Convention as a universal instrument, or at least as an instrument widely ratified by States of all continents and economic and political interests. Asset management is becoming increasingly important to an organization's strategy, given its effects on cost, production, and quality. No matter the sector, important decisions are made based on techniques and theories that are thought to optimize results; asset management models and techniques could help maximize effectiveness while reducing risk. Optimum Decision Making in Asset Management posits that effective decision making

can be augmented by asset management based on mathematical techniques and models. Resolving the problems associated with minimizing uncertainty, this publication outlines a myriad of methodologies, procedures, case studies, and management tools that can help any organization achieve world-class maintenance. This book is ideal for managers, manufacturing engineers, programmers, academics, and advanced management students. Publicado por la Universidad Nacional de Educación a Distancia, se ofrece en esta obra una contribución sistemática y de autoridad sobre la problemática que plantea el Tratamiento Educativo de la Diversidad en el momento actual y sobre las propuestas de intervención que ofrecen garantías de éxito en la acción educativa dirigida a personas que muestran algún tipo de diversidad y a aquellas otras que, dentro de un ineludible enfoque inclusivo, abordan también su propio desarrollo personal. Este libro examina los efectos de la modernización administrativa en el marco jurídico, cuyo desplazamiento o indeterminación en la gestión pública, con independencia de las políticas que se planteen, irrumpe en los principios del Estado de Derecho y pone en riesgo su función esencial en la forma liberal democrática. El análisis histórico integral del fenómeno de la modernización, esclarece las relaciones entre las dimensiones jurídica y técnica con los sectores público y privado. Esto permite reconocer el papel director del marco jurídico-administrativo en el servicio de los intereses generales, objetivo esencial de la Administración pública. Presenting social innovation initiatives that emerged from organized citizenry in Southern European cities, this book explores the response to austerity policies implemented after the 2008 economic crisis. Chapters look at the common aim of these initiatives in responding to social needs and challenging social exclusion. Contains the 4th session of the 28th Parliament through the 1st session of the 48th Parliament. This book examines the ways in which quality management methods, tools, and practices help improve an organization's performance and achieve sustainable competitive advantages. This volume includes quality techniques and tools such as the EFQM Model, SERVPERF model, E-S-Qual scale and the ISO 9001 certification and provide a wide variety of empirical studies in different economic sectors. In the current economic environment, characterized by economic turmoil and fierce competition, quality management has become a key strategy for organizations to overcome today's challenges. Organizations benefit from implementing quality management systems by following two approaches. First, they implement quality practices aimed at ensuring customer satisfaction by considering consumer expectations and establishing strategies accordingly. Second, organizations improve processes by establishing efficient and effective process management systems that improve productivity, lower costs, reduce unnecessary expenses, eliminate all non-value added activities, and ultimately maximize excellence and customer satisfaction. Quality management thereby provides tools, techniques, and methods for continuous process improvement in both the professional and academic worlds, which, when implemented by organizations in times of crisis, enable more effective administration of activities undertaken by managers. Containing contributions from various academics and scholars, this new book provides cutting edge research, methods and techniques providing a reference manual for academics, scholars, practitioners and policy-makers. Utilizing hundreds of confidential documents from authorities in the Franco government, *Fear and Progress: Ordinary Lives in Franco's Spain, 1939-1975* recounts the experiences of Spanish citizens who lived during the 40-year Franco dictatorship. Rejects traditional explanations of the length of Franco's power and the dictator's legacy Utilizes hundreds of confidential documents from authorities in the Franco government Provides insights into life during the Franco era: how political violence and repression were experienced; how the dictatorship exploited illusions of peace and prosperity for its own benefit; and how the regime's legacy was manipulated Reveals the Franco government's social callousness and manipulation of events Wie berät man Jugendliche und junge Menschen optimal, die eine Ausbildung, ein Studium oder einen Beruf im Ausland beginnen möchten? Écrit par les fondateurs des sciences de gestion en France, le Lexique de gestion et de management a déjà formé plusieurs générations d'étudiants et de praticiens. Cette 9e édition, entièrement revue et profondément actualisée, met les mots du management à la portée de tous. Les 4000 entrées couvrent toutes les fonctions de l'entreprise (marketing, finance, production, RH, stratégie...) et son environnement (économie, sociologie, droit...). Parmi les 200 nouvelles entrées : big data, business model, consommation collaborative, contrat psychologique, COOC, crowdfunding, design management, entrepreneuriat, entretien annuel d'évaluation, e-réputation, finance comportementale, GAFA, génération X, Y, Z, innovation de rupture, organisation apprenante, stratégie BoP, stratégie Océan bleu, tableau de bord prospectif, whistleblowing... + les auteurs les plus marquants de la discipline. OECD's 2000 review of regulatory reform in Spain. This volume contains a selection of papers presented at TRAC 2014, as well as some invited contributions. In keeping with the aims of TRAC, several papers make innovative use of interdisciplinary theory: in humanistic geography, philosophy and archaeology; social psychology; and the cognitive science of religion in the study of Roman monuments, military social history and religion. Other papers share a common theme: the critical interpretation of archaeological evidence. A more careful consideration of non-grave good pottery sherds from graves suggests that these often disregarded items potentially shed light on funerary rites which are usually considered to be invisible; the potential importance of plant remains, particularly of exotic and rare species, in ritual deposits is examined and a new perspective on the negative aspects of Roman conquest of Northern Gaul presented. New approaches towards our understanding of space and landscape in the Roman world comprise an examination of the suburbs of ancient Rome and preliminary results of an ongoing project exploring the relationship between wetland landscapes and domestic settlements, presenting a case study from Spain. This Proceedings Book collects the conference articles and abstracts presented at RICTA 2014, the 2nd Iberian Meeting on Aerosol Science and Technology (also named Reunión Ibérica de Ciencia y Tecnología de los Aerosoles), held during July 7-9, 2014, in Tarragona, Spain. RICTA 2014 is the second Portuguese-Spanish meeting on Aerosol Science and Technology. Like the previous RICTA congress held in 2013 in Évora, Portugal, RICTA 2014 is the continuation of the successful RECTA, Reunión Española de Ciencia y Tecnología de Aerosoles, conferences, which have been held in Spain since 2007. RICTA 2014 has been organized by the Droplets, interfaces, and flows (DEW) Research Laboratory of the Universitat Rovira i Virgili, with the collaboration of the Asociación Española de Ciencia y Tecnología de los Aerosoles (AECyTA). The congress was held at the Campus Catalunya of the Universitat Rovira i Virgili. As in previous editions of RICTA and RECTA, the participation of young researchers has been encouraged, with the organization of the 5th Summer School on Aerosol Science and Technology, as well as awards for the best poster and PhD thesis. This book comprises three parts: the Conference Program, the Conference Articles, and the Conference Abstracts. For many citizens primary health care is the first point of contact with their health care system, where most of their health needs are satisfied but also acting as the gate to the rest of the system. In that respect primary care plays a crucial role in how patients value health systems as responsive to their needs and expectations. This volume analyses the way how primary care is organized and delivered across European countries, looking at governance, financing and workforce aspects and the breadth of the service profiles. It describes wide national variations in terms of accessibility, continuity and coordination. Relating these differences to health system outcomes the authors suggest some priority areas for reducing the gap between the ideal and current realities. This title covers topics such as: the urban travel mobility of social groups; transport, urbanism and accessibility; mass transport investment; regulation, integration and financing public transport; road safety; and strategic approach, institution and governance. Much hope has been vested in pricing as a means of helping to regulate and rationalize water management, notably in the irrigation sector. The pricing of water has often been applied universally, using general

and ideological policies, and not considering regional environmental and economic differences. Almost 15 years after the emphasis laid at the Dublin and Rio conferences on treating water as an economic good, a comprehensive review of how such policies have helped manage water resources and irrigation use is necessary. The case-studies presented here offer a reassessment of current policies by evaluating their objectives and constraints and often demonstrating their failure by not considering the regional context. They will therefore contribute to avoiding costly and misplaced reforms and help design water policies that are based on a deeper understanding of the factors which eventually dictate their effectiveness. Confirming his moniker as “America’s philosopher of democracy,” John Dewey engaged in a series of public debates over the course of his lifetime, vividly demonstrating how his thought translates into action. These debates made Dewey a household name and a renowned public intellectual during the early to mid-twentieth century, a time when the United States fought two World Wars, struggled through an economic depression, experienced explosive economic growth and spawned a grassroots movement that characterized an entire era: Progressivism. Unfortunately, much recent Dewey scholarship neglects to situate Dewey’s ideas in the broader context of his activities and engagements as a public intellectual. This project charts a path through two of Dewey’s actual debates with his contemporaries, Leon Trotsky and Robert Hutchins, to two reconstructed debates with contemporary intellectuals, E.D. Hirsch and Robert Talisse, both of whom criticized Dewey’s ideas long after the American philosopher’s death and, finally, to two recent debates, one on home schooling and the other on U.S. foreign policy, in which Dewey’s ideas offer a unique and compelling vision of a way forward.

This Book of Abstracts is the main publication of the 71st Annual Meeting of the European Federation of Animal Science (EAAP). It contains abstracts of the invited papers and contributed presentations of the sessions of EAAP's eleven Commissions: Animal Genetics, Animal Nutrition, Animal Management and Health, Animal Physiology, Cattle Production, Sheep and Goat Production, Pig Production, Horse Production and Livestock Farming Systems, Insects and Precision Livestock Farming. First published in 1984, this book addresses key questions about the pattern of urban development in Southern Europe and the mechanisms employed to control and regulate this development in individual countries. It examines five countries – Greece, Italy, Portugal, Spain and Turkey – that have experienced different scales and rates of urbanization and industrialization. It identifies common problems arising from these processes, as well as the successes and failures of the planning policies employed to regulate development. This book will be of great value to geographers interested in Southern Europe and urban and regional planners interested in comparative patterns of development.

La réforme de la réglementation a joué un rôle déterminant dans la forte croissance économique que connaît l’Espagne depuis quelques années. L’Espagne a mis en oeuvre une libéralisation de grande envergure des échanges et de l’investissement, elle a ... Triticale, the first successful human-made cereal grain, was produced in 1875 by crossing wheat with rye. This publication contains updated information on various aspects of triticale production, uses and marketing strategies worldwide; and it includes 13 country reports on the crop's production and research status.

Lavapiés - diverse, multicultural, and one of Madrid’s most iconic neighbourhoods - has emerged as a locus of resistance movements and of cultural flourishing. Poised at the intersection of theatre studies and cultural geography, this innovative study sketches its physical and imaginary contours. In *From the Theater to the Plaza* Matthew Feinberg guides readers on a journey through the development of the theatre, as both art and space, in Lavapiés. Offering a detailed analysis of dramatic texts and productions, performance spaces, urban planning documents, and the cultural activities of squatters, Feinberg sheds new light on the lead-up to Spain’s economic crisis and the emergence in 2011 of the 15-M anti-austerity protest movement. The result is a multidisciplinary account of how the spectacle of the contemporary city connects local, municipal, and global geographies. By linking the neighbourhood’s unique role as both a site and a subject of Madrid’s theatre tradition with its contemporary struggles over gentrification, *From the Theater to the Plaza* offers new approaches for understanding how culture and capital produce the twenty-first-century city. explores the formation and socio-spatial trajectories of large housing estates in Europe. Are these estates clustered or scattered? Which social groups originally had access to residential space in housing estates? What is the size, scale and geography of housing estates, their architectural and built environment composition, services and neighbourhood amenities, and metropolitan connectivity? How do housing estates contribute to the urban mosaic of neighborhoods by ethnic and socio-economic status? What types of policies and planning initiatives have been implemented in order to prevent the social downgrading of housing estates? The collection of chapters in this book addresses these questions from a new perspective previously unexplored in scholarly literature. The social aspects of housing estates are thoroughly investigated (including socio-demographic and economic characteristics of current and past inhabitants; ethnicity and segregation patterns; population dynamics; etc.), and the physical composition of housing estates is described in significant detail (including building materials; building form; architectural and landscape design; built environment characteristics; etc.). This book is timely because the recent global economic crisis and Europe's immigration crisis demand a thorough investigation of the role large housing estates play in poverty and ethnic concentration. Through case studies of housing estates in 14 European centers, the book also identifies policy measures that have been used to address challenges in housing estates throughout Europe. This open access book explores the history of risk management in medieval and early modern European maritime business, focusing particularly on 'General Average' – a mechanism by which extraordinary expenses regarding ship or cargo, incurred during a voyage to save the venture, are shared between all participants to protect equity. This volume traces the history of this risk management tool from its origins in the pre-Roman Mediterranean through to its use in the shipping sector today. Contributions range from the Islamic Mediterranean to the Low Countries, and taken together, provide a wide-ranging analysis of social, cultural, and political aspects of pre-modern maritime commerce in Europe. *Televisión: un medio publicitario dinámico y eficaz.
