Actuality Inferences May 19 2020 This book investigates the phenomenon of actuality inferences, in which claims of ability are-in certain temporal contexts- interpreted as descriptions of actual events, instead of as descriptions of potentialities or possibilities. Although actuality inferences evidently arise in the

interaction between modality and aspect, they have long resisted compositional explication in standard treatments of these semantic categories. Perna Nadathur here pursues a new approach, in which actuality inferences are linked to a novel component in the semantics of ability: causal dependence relations. The account is developed through a comparative, crosslinguistic semantic analysis of three predicate classes that license similar inferences: implicative verbs in Finnish and English, enough/too predicates in French and English, and (modal) ability

predicates in French, Hindi, and English. Similarities in the inferential profiles of these predicates are tied to their shared causal background structure, while their differences—including in sensitivity to grammatical aspect—derive from differences in asserted content and associated aspectual class contrasts. The central argument is that a complex causal structure for ability interacts with the compositional requirements of aspect to derive the observed actuality-ability ambiguity. The volume shows that causal structure and causal relationships shape patterns of

linguistic inference beyond the overtly causal domain, and thus contributes to a new and growing body of research in which formal, computational causal models are employed as an analytic tool for lexical and compositional semantics.

[A Teacher for All Generations](#) Jun 19 2020 This collection of essays honors James C. VanderKam on the occasion of his sixty-fifth birthday and twentieth year on the faculty of the University of Notre Dame. An international group of scholars including peers specializing in Second Temple Judaism and Biblical Studies, colleagues past and present, and former students offers essays that interact

in various ways with ideas and themes important in VanderKam's own work. The collection is divided into five sections spanning two volumes. The first volume includes essays on the Hebrew Bible and ancient Near East along with studies on Qumran and the Dead Sea Scrolls. Essays in the second volume address topics in early Judaism, Enoch traditions and Jubilees, and the New Testament and early Christianity.

Paper Controlled Natural Language Sep 22 2020 Controlled natural languages (CNLs) are subsets of natural languages, obtained by -

stricting the grammar and vocabulary in order to reduce or eliminate ambiguity and complexity. Traditionally, controlled languages fall into two major types: those that - prove readability for human readers, and those that enable reliable automatic semantic analysis of the language. [. . .] The second type of languages has a formal logical basis, i. e. they have a formal syntax and semantics, and can be mapped to an existing formal language, such as first-order logic. Thus, those languages can be used as knowledge representation languages, and writing of those languages is

supported by fully automatic consistency and redundancy checks, query answering, etc. Wikipedia Varioucontrollednatural languagesof the second type have been developedby a number of organizations, and have been used in many different application domains, most recently within the Semantic Web. The workshop CNL 2009 was dedicated to discussing the similarities and the differences of existing controlled natural languages of the second type, possible improvements to these languages, relations to other knowledge representation languages, tool support, existing

and future applications, and further topics of interest.

[The Septuagint and Messianism](#) Oct 04 2021 The question of the extent to which the Septuagint reflects an evolution in

messianic belief in comparison with the Masoretic Text has come into prominence in recent years, and in view of the role played by messianism in Jewish belief of the late Second Temple period and in early Christianity it seemed very appropriate that "The Septuagint and Messianism" should be chosen as the theme of the 2004 Colloquium Biblicum Lovaniense. This volume contains the papers given at the Colloquium, which are concerned both with methodological issues and with the interpretation of specific texts (in practice the majority of the texts in the Septuagint

for which a messianic interpretation has been claimed). The papers are very far from all reflecting the same approach, and it has frequently happened that the same texts have been treated by different contributors from very different viewpoints. But the fact such different viewpoints are expressed is a proper reflection of the complexity of the issues involved in the question of the extent of messianic belief in the Septuagint, and of the fact that the question requires a nuanced answer. It is in any case hoped that the varied approaches reflected in the papers will serve to

make clear the underlying reasons for the differences between those who take a "minimalist" and those who take a "maximalist" view on the subject of the Septuagint and Messianism.

The Long Road Home Dec 18 2022
The Long Road Home is a companion work to the recently published book on the prisoner of war experience in Southeast Asia- Honor Bound by

Stuart I. Rochester and Frederick Kiley. The two books were prepared at the request of former Deputy Secretary of Defense William P. Clements, Jr. Some of the early research and drafts of a few chapters are the contribution of Wilber W Hoare, Jr., and Ernest H. Giusti, former JCS historians who helped initiate the project. Davis carried forward the research and writing to completion over a period of many years and is entitled to the fullest credit for production of the final text and documentation. This history of Washington's role in shaping prisoner of war policy during

the Vietnam War reveals the difficult, often emotional, and vexing nature of a problem that engaged the attention of the highest officials of the U.S. government, including the president. It examines frictions and disagreements between the State and Defense Departments and within Defense itself as a sometimes conflicted organization struggled to cope with an imposing array of policy issues: efforts to ameliorate the brutal conditions to which the American captives were subjected; relations with families of prisoners in captivity; the

proper mix of quiet diplomacy and aggressive publicity; and planning for the prisoners' return. At a pivotal juncture the Department of Defense exerted a major influence on overall policy through its insistence in 1969 that the government "Go Public" with information about the plight of prisoners held by the North Vietnamese and the Viet Cong. There is evidence that this powerful campaign contributed to the gradual improvement in the treatment of the prisoners and to their safe return in 1973. The detailed account of negotiations with

the North Vietnamese for the withdrawal of American forces from South Vietnam makes clear how important in all U.S. calculations was securing the release of the prisoners.

Studies in Isaiah 24-27 Aug 02 2021
The Isaiah 'Apocalypse', Isaiah 24-27, is an enigmatic text. Linguistic structure

and literary composition can not be discerned easily. The contributions to this volume, the result of studies and discussions which have taken place in the Dutch Isaiah Workshop, treat various aspects of this problem. The overall structure of the 'Apocalypse' is investigated from three rather new points of view, that of text syntax, verse structure and traditional, e.g. Massoretic, segmentation. Other studies of this volume deal with difficult passages and interesting themes. Attention is also given to the most persistent interpretative problem: what is the cohesion of the

text as far as time, place and action or actants are concerned? An annotated translation and a select bibliography complete this stimulating volume. *Israel Central Bank & Financial Policy Handbook Volume 1 Strategic Information and Important Regulations* Feb 08 2022

The Industrial Information Technology Handbook Aug 22 2020 The Industrial Information Technology Handbook focuses on existing and emerging industrial applications of IT, and on evolving trends that are driven by the needs of companies and by industry-led consortia and

organizations. Emphasizing fast growing areas that have major impacts on industrial automation and enterprise integration, the Handbook covers topics such as industrial communication technology, sensors, and embedded systems. The book is organized into two parts. Part 1 presents material covering new and quickly evolving aspects of IT. Part 2 introduces cutting-edge areas of industrial IT. The Handbook presents material in the form of tutorials, surveys, and technology overviews, combining fundamentals and advanced issues,

with articles grouped into sections for a cohesive and comprehensive presentation. The text contains 112 contributed reports by industry experts from government, companies at the forefront of development, and some of the most renowned academic and research institutions worldwide. Several of the reports on recent developments, actual deployments, and trends cover subject matter presented to the public for the first time.

Betrayal Of

Palestine Nov 05

2021 This definitive biography of George Antonius tells the life story of a man who lived

during a dramatic period of history, amid challenge that remains unresolved: the Palestine-Zionist conflict. Betrayal of Palestine is an important and innovative work about the continuing controversy of empire and nationalism. This book traces Antonius's contribution and ideas on nation building and good governance and resonates for contemporary seekers of peace in the Middle East. As an archaeology of ideas and meaning, the book will be of great significance for the millennium. It speaks to the paradigm of a conqueror's code, and to the ever

present danger of special interests capturing public policy and corrupting good governance. By rediscovering Antonius's message about institutions and nation building, and the true meaning of morality, conscience and public service, Betrayal of Palestine speaks to contemporary people in a voice that reconnects the past with the present. The book offers hope to a region where many solutions have failed, and a reminder that the solutions have been there all along, in the people and traditions of the Middle East, but they have been obscured by a

conqueror's code of empire and nationalism. It is a reminder of the genius of democracy and the power of first principles: that ordinary people are important, that power must be shared, and that society as nation transcends tribalism and its more virulent contemporary form: nationalism.

XIV Congress of the International Organization for Septuagint and Cognate Studies, Helsinki, 2010 Dec 14 2019 This volume represents the current state of Septuagint studies as reflected in papers presented at the triennial

meeting of the International Organization for Septuagint and Cognate Studies (IOSCS). It is rich with contributions from distinguished senior scholars as well as from promising younger scholars whose research testifies to the bright future and diversity of the field. The volume is remarkable in terms of the number, scholarly interests, and geographical distribution of its contributors; it is by far the largest congress volume to date. More than fifty papers represent viewpoints and scholarship from

Belgium, Canada, Cameroon, Finland, France, Germany, Israel, Korea, The Netherlands, South Africa, Spain, the United Kingdom, and the United States.
