**Hurricane Watch** Oct 13 2019 Winds whip. Waves crash. Rain pours down. A superstorm moves across the ocean and gets closer and closer to land. Hurricane watch! Read and find out how hurricanes form, how scientists track the storms, and what you can do to keep yourself safe if one strikes. With colorful illustrations from Taia Morley and engaging text from Melissa Stewart, *Hurricane Watch* is a look into a powerful natural disaster. Perfect for budding meteorologists, *Hurricane Watch* is bursting with fascinating facts paired with engaging visuals and diagrams. This picture book also includes a Find Out More section with an activity on air pressure, web research prompts, and a glossary of storm and weather vocabulary. Both text and artwork were vetted by Dr. William J. Brennan of the National Oceanic and Atmospheric Administration for accuracy. This is a Level 2 Let's-Read-and-Find-Out, which means the book explores more challenging concepts for children in the primary grades and correlates to the Common Core State Standards in English Language Arts and Next Generation Science Standards.

*All About Tornadoes (A True Book: Natural Disasters)* Feb 15 2020 Conditions on Earth are becoming more

and more extreme and kids want to learn about it! Is it true that tornadoes have the strongest winds on Earth? Yes! Their winds can reach 300 miles per hour (483 kph), sweeping up anything in their paths. They can toss cars and trees through the air and even level entire towns. **INSIDE, YOU'LL FIND:** • How tornadoes form, how they spin, and an account of the most dangerous tornadoes in recent history; • A hands-on activity, a timeline, photos, diagrams—and how meteorologists study tornadoes to keep people safe; • Surprising TRUE facts that will shock and amaze you! This new set in the ongoing A TRUE BOOK series will answer all of kids' questions about nature's most dangerous and destructive disasters! With an engaging layout, and spectacular photos, illustrations, diagrams and infographics, the past, present and future of extreme phenomenon happening on Earth will be explained. Readers will discover causes and consequences, as well as the cutting-edge science developed through the centuries to forecast them. First-hand accounts will bring science to life, and a special section will teach kids how to prepare for these extreme events.

*Hurricane Hunters!* Nov 18 2022 Acclaimed author and artist Chris L. Demarest takes you inside the heart of a hurricane with real-life adventurers who risk their lives to keep our shorelines safe. It's a sunny, beautiful day on America's southeastern coast. But out in the Atlantic Ocean, chaos is brewing. Waves are crashing. Winds are blowing. And the National Hurricane Center is calling the Hurricane Hunters! While those on land prepare for the worst, these brave men and women fly into the heart of a two-hundred-mile-wide hurricane and collect information. The crucial data that they gather provides better predictions of where storms are headed, allowing people to evacuate and saving hundreds, maybe thousands, of lives.

**How to Name a Hurricane** May 12 2022 There's no denying it, media culture has ushered in a new era of visibility for gays in America. Yet somehow the gay Latino doesn't fit into this sound-bite identity and usually isn't included in national media images. Rane Arroyo offers a corrective. Known primarily as a poet and playwright representing the gay Latino community, Arroyo has also been publishing prose throughout his career and now gathers into this book a storm of writing that has been gaining strength, drop by drop, for

more than ten years. *How to Name a Hurricane* collects short stories and other fictions depicting Latino drag queens and leather men, religious sinners and happy atheists, working class heroes and cyberspace vaqueros. A parade of characters that invites readers to consider whether one is more authentic a gay Latino than another. Whereas actual hurricanes are given names, the gays given voice in this collection must name themselves. And these narratives in turn reveal something of the "I" of Hurricane Rane. Whether portraying a family gathering as *Brideshead Revisited* with a mambo soundtrack, recounting the relationship of transvestite Louie/Lois and her bisexual Superman, or bemoaning "feeling as unsexy as an old bean burrito in a 7-11 microwave," Arroyo tracks the heartbeat of his characters through a shimmering palette of styles. Here are monologues, a story in verse, and other experimental forms appropriate to experimental lives. All affirming the basic human rights to dignity, equality, love, and even silliness. When the AIDS epidemic first hit, many Latino families destroyed any remembrances of their gay and bisexual sons that might betray their pasts to la familia or el pueblo. Arroyo's writings return the ghosts of those sons to the families, bars, dance clubs, and neighborhoods where they belong. By penetrating to the I's of narrative hurricanes, these stories honor the survivors of our ongoing cultural storms.

I of the Hurricane Aug 23 2020 Instant love takes place between a young pet store employee and a small white puppy. She takes her pup home to meet the household which includes another dog, Prince, and two white cats – Thunder and Lightning. **Don't Call Me a Hurricane** Jul 02 2021 An affecting and resonant YA novel in verse that explores family,

community, the changing ocean tides, and what it means to fall in love with someone who sees the world in a different way. It's been five years since a hurricane ravaged Eliza Marino's life and home in her quiet town on the Jersey shore. Now a senior in high school, Eliza is passionate about fighting climate change-starting with saving Clam Cove Reserve, an area of marshland that is scheduled to be turned into buildable lots. Protecting the island helps Eliza deal with her lingering trauma from the storm, but she still can't shake the fear that something will come along and wash out her life once again. When Eliza meets Milo Harris at a party, she tries to hate him. Milo is one of the rich tourists who flock to the island every summer. But after Eliza reluctantly agrees to give Milo surfing lessons, she can't help falling for him. Still, Eliza's not sure if she's ready to risk letting an outsider into the life she's rebuilt. Especially once she discovers that Milo is keeping a devastating secret. Told in stunning verse, *Don't Call Me a Hurricane* is a love story for the people and places we come from, and a journey to preserve what we love most about home.

**Engineering Investigations of Hurricane Damage** Dec 27 2020 This publication provides civil engineers with the background and guidance necessary to conduct engineering damage investigations of structures following hurricanes, focusing particularly on distinguishing between wind damage and water damage.

White Hurricane Jun 20 2020 "Brings history to life in a book as readable as any novel." --Good Old Boat On Friday, November 7, 1913, after four days of winds up to 90 miles an hour, whiteout blizzard conditions, and mountainous seas, 19 ships had been lost on the great-lakes, 238 sailors were dead, and Cleveland was confronting the worst natural disaster in its history. David G. Brown combines narrative intensity with factual depth to re-create the "perfect storm" that struck America's heartland. Brown has created a vast epic ranging over Lakes Superior, Michigan, Huron, and Erie and echoing down the decades.

Isaac's Storm Sep 16 2022 At the dawn of the twentieth century, a great confidence suffused America. Isaac Cline was one of the era's new men, a scientist who believed he knew all there was to know about the motion of clouds and the behavior of storms. The idea that a hurricane could damage the city of Galveston, Texas,

where he was based, was to him preposterous, "an absurd delusion." It was 1900, a year when America felt bigger and stronger than ever before. Nothing in nature could hobble the gleaming city of Galveston, then a magical place that seemed destined to become the New York of the Gulf. That August, a strange, prolonged heat wave gripped the nation and killed scores of people in New York and Chicago. Odd things seemed to happen everywhere: A plague of crickets engulfed Waco. The Bering Glacier began to shrink. Rain fell on Galveston with greater intensity than anyone could remember. Far away, in Africa, immense thunderstorms blossomed over the city of Dakar, and great currents of wind converged. A wave of atmospheric turbulence slipped from the coast of western Africa. Most such waves faded quickly. This one did not. In Cuba, America's overconfidence was made all too obvious by the Weather Bureau's obsession with controlling hurricane forecasts, even though Cuba's indigenous weathermen had pioneered hurricane science. As the bureau's forecasters assured the nation that all was calm in the Caribbean, Cuba's own weathermen fretted about ominous signs in the sky. A curious stillness gripped Antigua. Only a few unlucky sea captains discovered that the storm had achieved an intensity no man alive had ever experienced. In Galveston, reassured by Cline's belief that no hurricane could seriously damage the city, there was celebration. Children played in the rising water. Hundreds of people gathered at the beach to marvel at the fantastically tall waves and gorgeous pink sky, until the surf began ripping the city's beloved beachfront apart. Within the next few hours Galveston would endure a hurricane that to this day remains the nation's deadliest natural disaster. In Galveston alone at least 6,000 people, possibly as many as 10,000, would lose their lives, a number far greater than the combined death toll of the Johnstown Flood and 1906 San Francisco Earthquake. And Isaac Cline would experience his own unbearable loss. Meticulously researched and vividly written, Isaac's Storm is based on Cline's own letters, telegrams, and reports, the testimony of scores of survivors, and our latest understanding of the hows and whys of great storms. Ultimately, however, it is the story of what can happen when human arrogance meets nature's last great uncontrollable force. As such, Isaac's Storm carries a

warning for our time.

**Eye of the Storm** Sep 23 2020 Describes what a hurricane is, how it forms, and the damage it can do.

**Hurricane Watch** Jun 13 2022 The ultimate guide to the ultimate storms, Hurricane Watch is a fascinating blend of science and history from one of the world's foremost meteorologists and an award-winning science journalist. This in-depth look at these awe-inspiring acts of nature covers everything from the earliest efforts by seafarers at predicting storms to the way satellite imaging is revolutionizing hurricane forecasting. It reveals the latest information on hurricanes: their effects on ocean waves, the causes of the variable wind speeds in different parts of the storm, and the origins of the super-cooled shafts of water that vent at high altitudes. Hurricane Watch is a compelling history of man's relationship with the deadliest storms on earth. Includes: - The story of the nineteenth-century Cuban Jesuit whose success at predicting the great cyclones was considered almost mystical. - A new look at Isaac Cline, whose infamous failure to predict the Galveston Hurricane left him obsessed with the devastating effects of storm surge. - The story of the Hurricane Hunters, including the first man ever to deliberately fly into a hurricane. - A complete account of how computer modeling has changed hurricane tracking. - A history of Project Stormfury: the only significant, organized effort to reduce the damaging strength of severe hurricanes. - A unique firsthand account of Hurricane Andrew by both authors, who were at the National Hurricane Center when Andrew struck. - A listing of the deadliest storms in history.

**Rowboat in a Hurricane** Mar 10 2022 Told by the first woman who ever traveled across the Atlantic Ocean, from mainland to mainland, in a row boat, the experiences and observations of this daunting journey is presented in stunning detail, including her encounters with wildlife and issues dealing with the environment. **Like a Hurricane** Feb 21 2023 For a brief but brilliant season beginning in the late 1960s, American Indians seized national attention in a series of radical acts of resistance. Like a Hurricane is a gripping account of the dramatic, breathtaking events of this tumultuous period. Drawing on a wealth of archival materials, interviews, and the authors' own experiences of these events, Like a Hurricane offers a rare, unflinchingly honest assessment of the period's successes and failures.

**Hurricanes in Connecticut** Jun 01 2021 Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online. Pages: 25. Chapters: 1938 New England hurricane, Effects of Hurricane Floyd in New England, Hurricane Cindy (1959), Hurricane Irene. Excerpt: Hurricane Irene was a large and destructive tropical cyclone, which affected much of the Caribbean and East Coast of the United States during late August 2011. Irene is currently ranked as the seventh costliest hurricane in United States history. The ninth named storm, first hurricane, and first major hurricane of the 2011 Atlantic hurricane season, Irene originated from a well-defined Atlantic tropical wave that began showing signs of organization east of the Lesser Antilles. Due to development of atmospheric convection and a closed center of circulation, the system was designated as Tropical Storm Irene on August 20, 2011. After intensifying, Irene made landfall in St. Croix as a strong tropical storm later that day. Early on August 21, the storm made a second landfall in Puerto Rico. While crossing the island, Irene strengthened into a Category 1 hurricane. The storm paralleled offshore of Hispaniola, continued to slowly intensify in the process. Shortly before making four landfalls in the Bahamas, Irene peaked as a 120 mph (195 km/h) Category 3 hurricane. Thereafter, the storm slowly leveled-off in intensity as it struck the Bahamas and then curved northward after

passing east of Grand Bahama. Continuing to weaken, Irene was downgraded to a Category 1 hurricane before making landfall on the Outer Banks of North Carolina on August 27, becoming the first hurricane to make landfall in the United States since Hurricane Ike in 2008. Early on the following day, the storm re-emerged into the Atlantic from southeastern Virginia. Although Irene remained a hurricane over land, it weakened to a tropical storm while making yet another landfall in the Little Egg Inlet in southeastern New Jersey on August...

**Little Cloud Read-Along** Feb 26 2021 Follow our little cloud on an adventure through the sky and learn the science behind how it transforms from a simple cumulus cloud to a full-blown hurricane. Beautifully detailed illustrations from award-winning artist Julie McLaughlin integrate science with storytelling. Children will enjoy finding new gems of information even after several reads, thanks to a whimsical and rich layout. And meteorologist Johanna Wagstaffe weaves a comprehensive narrative about a powerful weather system that's so compelling readers won't even realize they are on their way to becoming budding meteorologists.

*Hurricane!* Mar 18 2020 One moment the sun is shining on the slopes of El Yunque, the largest mountain in eastern Puerto Rico. The next, everything has changed. The sky has turned deep purple, and you feel as if the air has been sucked from your lungs. That can mean only one thing: A hurricane is coming!

**Into the Storm** Oct 05 2021 "An intense, immersive deep dive into a wild, dangerous, and unknown world, written with the pace and appeal of a great thriller. This is nonfiction at its very best."—Lee Child The true story of two doomed ships and a daring search-and-rescue operation that shines a light on the elite Coast Guard swimmers trained for the most dangerous ocean missions With a new epilogue about a flight on a hurricane hunter In late September 2015, Hurricane Joaquin swept past the Bahamas and swallowed a pair of cargo vessels in its destructive path: El Faro, a 790-foot American behemoth with a crew of thirty-three, and the Minouche, a 230-foot freighter with a dozen sailors aboard. From the parallel stories of these ships and their final journeys, Tristram Korten weaves a remarkable tale of two veteran sea captains from very different

worlds, the harrowing ordeals of their desperate crews, and the Coast Guard's extraordinary battle against a storm that defied prediction. When the Coast Guard received word from Captain Renelo Gelera that the *Minouche* was taking on water on the night of October 1, the servicemen on duty helicoptered through Joaquin to the sinking ship. Rescue swimmer Ben Cournia dropped into the sea—in the middle of a raging tropical cyclone, in the dark—and churned through the monstrous swells, loading survivors into a rescue basket dangling from the helicopter as its pilot struggled against the tempest. With pulsating narrative skill in the tradition of Sebastian Junger and Jon Krakauer, Korten recounts the heroic efforts by Cournia and his fellow guardsmen to haul the *Minouche*'s crew to safety. Tragically, things would not go as well for Captain Michael Davidson and *El Faro*. Despite exhaustive searching by her would-be rescuers, the loss of the vessel became the largest U.S. maritime disaster in decades. As Korten narrates the ships' fates, with insights drawn from insider access to crew members, Coast Guard teams, and their families, he delivers a moving and propulsive story of men in peril, the international brotherhood of mariners, and the breathtaking power of nature. Praise for *Into the Storm* “The story [Tristram] Korten tells is impressively multifaceted, exploring everything from timely issues such as climate change to timeless themes such as man's struggle against the ocean's fury.”—Miami New Times “*Into the Storm* is a triumph of reporting and you-are-there writing that becomes a deeper tale—with more implications about our own lives—with every chapter.”—Robert Kurson, New York Times bestselling author of *Shadow Divers*

**Over in the Wetlands** May 20 2020 Publishing in time for the tenth anniversary of Hurricane Katrina, here is a beautiful read-aloud about animal families preparing for an impending storm in their bayou habitat. Journey to the Louisiana wetlands and watch as all the animals of the bayou experience one of nature's most dramatic and awe-inspiring events: a hurricane. The animals prepare—swimming for safer seas, finding cover in dens, and nestling their young close to protect them. During the height of the storm, even the trees react, cracking and moaning in the wind. At last, the hurricane yawns and rests, and animals come out to

explore their world anew.

**Into the Hurricane** Jan 08 2022 TWO PEOPLE WITH LOSSESEli and Max both have good reasons to go to the lighthouse on Shackles Island. For Max, it's an old vacation spot, the rare location where she has only good memories -- so it's the right place to scatter her dad's ashes. For Eli, it's the highest point near his Louisiana home, with the clearest view of the rocks where his sister died -- so it's the right place to end his own life as well. A STORM WITHOUT LIMITSBut neither of them expected the other, nor the storm. Because Hurricane Celeste is roaring toward Shackles Island, and its power will break bridges, slash electric lines, and stir up deadly wildlife -- some of it human. When the ruthless Odenkirk family steals Max's Jeep with her most precious possession inside, she and Eli begin a desperate quest to get it back and get off the island ... until they realize they must go into the hurricane.

*Hurricane Dorian—The Story of the Greatest and Deadliest Hurricane To* Apr 30 2021 Hurricane Dorian is a heartbreaking tale for The Bahamas. It was one of the strongest North Atlantic hurricanes and the strongest Bahamian hurricane and caused about \$3.4 billion in damages to the Bahamian economy. Hurricane Dorian

struck Abaco and Grand Bahama with wind speeds of 185 mph and had the highest wind speeds for a North Atlantic landfalling hurricane. The storm caused the death of 74 people in The Bahamas. In addition, more than 75 percent of all homes on Abaco were either damaged or destroyed. In East End, Grand Bahama, satellite data suggested that 76 to 100 percent of the buildings were destroyed. This book includes the meteorological history, records broken, compelling personal recollections, its impact on each island affected, a chapter on climate change and its effects on hurricanes, the benefits of hurricanes, and why we need them on planet Earth. This book is a must-read!

**Hurricanes** Jul 14 2022 A hurricane is a tropical storm with winds that have reached a constant speed of 74 miles per hour or more. Hurricane winds blow in a large spiral around a relative calm centre known as the "eye." The "eye" is generally 20 to 30 miles wide, and the storm may extend outward 400 miles. As a hurricane approaches, the skies will begin to darken and winds will grow in strength. As a hurricane nears land, it can bring torrential rains, high winds, and storm surges. A single hurricane can last for more than 2 weeks over open waters and can run a path across the entire length of the eastern seaboard. August and September are peak months during the hurricane season that lasts from 1 June to 30 November. This book presents the facts and history of hurricanes.

**What Is a Hurricane?** Jan 20 2023 Vibrant, full-color photographs and accessible text help introduce young readers to hurricanes. Readers will learn how warm water and wind combine to form these powerful storms, which parts of the world are most affected and when, and what steps to take to prepare for these severe weather events.

**Hurricane!** Aug 15 2022 On 2012, Daniel Mayhew, a brilliant weather researcher, works with Kelly Delaney, totally dedicated to protecting the environment, to build Sub-Zero, a hurricane suppression system. When Kelly's theories about a category 6 hurricane are proven true, Sub-Zero is pressed into service. Unknown to either of them, General Stefano Lowe, part of a shadowy group known as the "Lucky Thirteen,"

is out to stop them. As Daniel and Kelly fight to disperse the storm, Kelly's family asks her to come home. They're convinced the world is entering the "End of Times." Meanwhile, Daniel's father, ignoring the signs of a storm approaching, goes sailing. General Stefano Lowe is electrocuted trying to sabotage the system, and the Sub-Zero system successfully disperses the storm. Later, Daniel's father is found alive! Taking him to the hospital, Kelly and Daniel realize that they have a future together even as another storm starts to build. Book Review: What would you do to prevent death and destruction from a huge storm or hurricane? Imagine being able to create a system that could dissipate a storm and make sure it never reached hurricane force. Daniel Mayhew invented something called Sub-Zero that could do just that. He presented it to the National Hurricane Center and it was approved by most of the members. But, there is a group called the Lucky 13 that would not relish its success and will do anything to discredit him and make sure the project never gets off the ground. Daniel finds hurricanes exciting, exhilarating even though he understands their dangers. Creating the Sub-Zero, which could prevent the loss of property, lives and destruction would save billions of dollars to anywhere these hurricanes or devastating storms hit. Kelly Delaney, who also works for the Hurricane Center, understands the threat to global warming and develops her own theory and presents it. She is concerned that category 6 hurricane storms will eventually be a thing of the present and suggests that the government buy up all of the coastal land and allow it to return to nature. However, both plans are unpopular and without government support there would be little chance either would be successful. When Daniel is successful in getting the government to fund his program the group called the Lucky 13 has to find a way to discredit him and the program too. As these unscrupulous people convince Daniel's father that he stole his money for his own purposes and not for what it was intended and then falsified papers making it seem that the project was over budget, it appeared the end had finally come even before this project could be implemented. Daniel is a weather researcher with many wild ideas about stopping hurricanes before they make landfall. Kelly's predictions about category 6 storms are related to deaf ears. But, what would happen if

a storm of this magnitude was brewing and no one did anything to prepare for it or believed it was going to happen? Well, you would have a group of wealthy men whose only goal is to make money off of the destruction, deaths and devastation caused by these storms. The more damage, the deaths, the more destruction the more money their construction and oil companies would make during the reconstruction process. Arnaldo Ricculi takes the reader on a dangerous ride through many storms and one impending storm that could destroy the world. A book about global warming, a topic that is relevant and important. Caring about the environment is important and Daniel and Kelly team up to stop the storm and teach the children of the state of Florida about hurricane safety in a well-crafted program they both create in order to teach children how dangerous hurricanes can be. Will Daniel ever get to implement his project? Will it work to decrease the density, volume and size of this catastrophic storm? How will this change Daniel's fathers poor perception of him and Kelly's about

*A Survivor's Guide to Emergency Preparedness* Nov 13 2019 When a storm emergency threatens, it may already be too late. A storm that threatens your life, your property, and your state of mind does irreparable damage to your soul. Learn how to survive any storm emergency. And, how you prepare for a storm emergency no matter what storm comes your way determines how you survive. The author was four years old when she experienced her first hurricane. Throughout the years she has endured earthquakes, tornadoes, winter storms with power outages for days, not to mention many nor'easters, tropical storms, and, of course, numerous hurricanes. This book is written to provide the reader with a list of items to prepare in case of weather-related emergencies, potential evacuation for hurricanes, or storm-related disasters. While preparing for any emergency, many items the author shares are everyday items that should be staples already found in your home. The author says, "I have been through many storms some with power outages for days. I've lived in states where nor'easters were common and tropical storms were frequent. I have prepared with water and food for at least a week to 10 days, and have never been without electricity for more than five days.

However, those days without electricity were even more challenging to me than during Hurricane Irma." The author continues, "I learned my lesson years ago to be prepared - always be prepared. And, it never hurts to be over-prepared, since in the end, if you don't prepare for any storm emergency, you'll panic, make bad choices, and possibly lose your life." Winter storms with potential for power outages occur December to April. Nor'easters can impact the northeastern United States just about any time of year. Tropical Storms are a grade or two below a hurricane. And Hurricane season runs from June 1st to November 30th each year. Some years hurricane activity is quiet. On August 25, 2017, the United States was hit first with Hurricane Harvey that decimated Houston, Texas and the southern Texas coast. Then, 16 days later came Hurricane Irma that ripped through the state of Florida from the Florida Keys to Jacksonville, and from the Gulf Coast to the Atlantic Coast. No where in Florida was spared. Eleven days later Hurricane Maria destroyed the U.S. Territory of Puerto Rico. Although Rosemary knows there will be many more storms, she wanted to share her personal survival guide that she uses before and after a storm that keeps her safe and prepared for any storm emergency. Currently a resident of Florida, she and her two kitties survived Hurricane Irma in 2017.

**Hurricane Katrina** Apr 18 2020 Recounts the events of Hurricane Katrina and the devastation it caused in New Orleans, discusses the global efforts to help the victims, and describes the rebuilding efforts.

The Hurricane Aug 03 2021 Emily McCarthy is living in fear of a dark and dangerous past. A gifted mathematician, she is little more than a hollow, broken shell, trying desperately to make ends meet long enough to finish her degree. Through an unlikely friendship with the aging, cantankerous owner of an old boxing gym, Em is thrown into the path of the most dangerous man that she has ever met. Cormac "the Hurricane" O'Connell is cut, tattooed and dangerous. He is a lethal weapon with no safety and everyone is waiting for the misfire. He's never been knocked out before, but when he meets Em he falls, HARD. Unlike any other girl he's ever met, she doesn't want anything from him. Just being around her makes him want to be a better person. They are polar opposites who were never meant to find each other, but some things are just

worth the fight.

*Mangled by a Hurricane!* Sep 04 2021 On August 28, 2005, Trina Peters heard some alarming

news—Hurricane Katrina was headed straight for her hometown of New Orleans, Louisiana. Though officials recommended evacuating the city, Trina and her daughter decided to stay in their home. However, the powerful hurricane caused their house to flood, and they had to climb up on their roof to stay above the rising water. Stranded on the roof in roaring winds and pouring rain, could Trina and her daughter survive the storm? Eyewitness accounts and incredible photos bring to life the experiences of ordinary people who faced catastrophic danger—and lived to tell their stories. Kids will discover the causes and characteristics of hurricanes, and learn about efforts to rebuild and prepare for future storms. Safety tips show young readers what to do in case a hurricane strikes.
