A guide to avoiding investment mistakes reveals the most common errors investors make and provides a framework for rethinking investment and money management strategies. This book arms you with a practical guide to investing sustainably, including how to effectively choose your asset allocation strategy, and select the managers and funds through which your money can create the change you want to see in the world. Warren Buffett, Carl Icahn, and George Soros all started with nothing--- and made billion-dollar fortunes solely by investing. But their investment strategies are so widely divergent, what could they possibly have in common? As Mark Tier demonstrates in this insightful book, the secrets that made Buffet, Icahn, and Soros the world's three richest investors are the same mental habits and

strategies they all practice religiously. However, these are mental habits and strategies that fly in the face of Wall Street's conventional mindset. For example: -Buffett, Icahn, and Soros do not diversify. When they buy, they buy as much as they can. -They're not focused on the profits they expect to make. Going in, they're not investing for the money at all. -They don't believe that big profits involve big risks. In fact, they're far more focused on not losing money than making it. -Wall Street research reports? They never read them. They're not interested in what other people think. Indeed, Buffett says he only reads analyst reports when he needs a laugh. In **The Winning Investment Habits of Warren Buffett & George Soros** you can discover how the mental habits that guided your last investment decision stack up against those of Buffett, Icahn, and Soros. Then learn exactly how you can apply the wealth-building secrets of the world's richest investors to transform your own investment results. How the greatest thinkers in finance changed the field and how their wisdom can help investors today Is there an ideal portfolio of investment assets, one that perfectly balances risk and reward? In **Pursuit of the Perfect Portfolio** examines this question by profiling and interviewing ten of the most prominent figures in the finance world—Jack Bogle, Charley Ellis, Gene Fama, Marty Leibowitz, Harry Markowitz, Bob Merton, Myron Scholes, Bill Sharpe, Bob Shiller, and Jeremy Siegel. We

learn about the personal and intellectual journeys of these luminaries—which include six Nobel Laureates and a trailblazer in mutual funds—and their most innovative contributions. In the process, we come to understand how the science of modern investing came to be. Each of these finance greats discusses their idea of a perfect portfolio, offering invaluable insights to today's investors. Inspiring such monikers as the Bond Guru, Wall Street's Wisest Man, and the Wizard of Wharton, these pioneers of investment management provide candid perspectives, both expected and surprising, on a vast array of investment topics—effective diversification, passive versus active investment, security selection and market timing, foreign versus domestic investments, derivative securities, nontraditional assets, irrational investing, and so much more. While the perfect portfolio is ultimately a moving target based on individual age and stage in life, market conditions, and short- and long-term goals, the fundamental principles for success remain constant. Aimed at novice and professional investors alike, *In Pursuit of the Perfect Portfolio* is a compendium of financial wisdom that no market enthusiast will want to be without. Explains how to recognize changing conditions in the economy, suggests appropriate investment strategies for each economic season and looks at stocks, bonds, gold, and real estate

Bedrock investing principles for profiting in today's shaky markets If you wanted to create the next earth-shattering consumer product, Steve Jobs would be an ideal role model to follow. If you planned to become a great golfer, you might look to Arnold Palmer or Jack Nicklaus. So, if your goals were to outperform other investors and achieve your life's financial goals, what should you do? Think, act and invest like the best investor out there: Warren Buffett. While you can't invest exactly like he does, *Think, Act, and Invest Like Warren Buffett* provides a solid, sensible investing approach based on Buffett's advice regarding investment strategies. When it comes to investing, Director of Research for the BAM Alliance and CBS News blogger Larry Swedroe has pretty much seen it all—and he's come to the conclusion that simple is better, that adopting basic investing principles always increases an investor's chance of success and that Buffett is the perfect model for such investing. In *Think, Act, and Invest Like Warren Buffett*, Swedroe provides the foundational knowledge you need to: Develop a financial plan to help you make rational decisions on a consistent basis Determine the level of risk that's right for you and allocate your assets accordingly Create a strong portfolio that will weather any economic storm Manage your portfolio—rebalance periodically to maintain proper risk levels The beauty of the

Buffett approach is its profound simplicity: follow the basics, keep your cool, and have a sense of humor. The market volatility of recent years has ushered in armies of economists, forecasters and other so-called experts whose job it is to explain how everything works. Somehow, they have managed to muddy the waters even more. The truth is, investing is easier than you think—even in today's economy. "Complex problems can have simple solutions," Swedroe writes. *Think, Act, and Invest Like Warren Buffett* helps you go back to the basics—so you can leap in front of the investing pack. Praise for *Think, Act, and Invest Like Warren Buffett*: "You could not spend a more profitable hour than reading Larry Swedroe's wise and lucid investment guide." —Burton Malkiel, author, *A Random Walk Down Wall Street* "If you've been wondering why you've had such a hard time investing well, *Playing the Winner's Game* will diagnose your ills and treat them in just ninety short, delightful pages." —William Bernstein, author, *A Splendid Exchange* and *The Investor's Manifesto* "Follow the investment strategy advocated by Larry Swedroe, and free yourself to spend your time on life's treasures—like your family and friends!" —William Reichenstein, professor, Baylor University "As someone who teaches a college investments course, I would not have thought it possible to do what Swedroe has done in such a short concise book." —Edward R. defined, repeatable investment process

**Winning Investment Strategies** is a comprehensive guide to successful investment strategies by two investment practitioners with decades of experience in asset management. Throughout the book, Bob Hagin and Kathleen DeRose draw upon their own experiences and include timely and original interviews with leading consultants, endowment heads, pension fiduciaries, and high net-worth investors. As the authors point out, successful investment management firms have a clearly defined, repeatable investment process that must include certain attributes and, at the same time, avoid fatal mistakes. This book skillfully puts that approach in perspective. Shows what it takes to build, monitor, and manage active institutional investment strategies

Written by two investment managers with decades of investment experience who share their insights on how to develop successful investment techniques

Debunks common investment myths that can often lead to fatal investing missteps

Using simple examples and anecdotes from real money manager experiences, this book dispels many popular myths about investment success and provides practical advice to investors, fiduciaries, and consultants. The 2008-2009 market meltdown and house price collapse has reset the credit and property cycles, and smart investors are now looking for the upside. But

Where Will the Next Bull Run

**Come From, and How Can Investors Take Advantage?**

The world is now facing staggering change, including exponential performance growth in many technologies. We can expect computers that are smarter than people, self-driven cars and a truly intelligent Internet. We are also facing a biotechnological revolution enabling personalized medicine, fourth generation biofuels, radical extension of human life expectancy, exponential growth in farm yields, and even the recreation of extinct species. Furthermore, our energy sector is facing a complete transformation which will eventually make our energy supply limitless. Meanwhile, our population will grow, age and urbanize, and - largely due to emerging market growth - global purchasing power will have quadrupled by 2050. What will this mean for commodity prices, the environment and growth sectors such as real estate, global finance and luxury?

Supertrends explains not only what will happen, but also how and why. Having himself run several hugely profitable funds through seeking out long term opportunities and having set up and sold several award winning technology and new media companies, author Lars Tvede shows readers how to identify and profit from the investment opportunities of the future. If you need to be prepared for the rest of your life, this is the book for you.

Warren Buffet and George Soros both started with nothing

and made billion-dollar fortunes solely by investing. At first glance they seem to have nothing in common: Buffett buys bargain-priced stocks and businesses for cash; and Soros is renowned for his highly-leveraged, quick-footed bets in the currency markets. So what do they have in common? As Mark Tier demonstrates in **The Winning Investment Habits of Warren Buffet and George Soros**, they practice exactly the same mental habits and strategies when investing, and these tactics have since been used successfully by all other traders and investors that Tier has worked with - without exception. By sharing 23 key investment habits in this ground-breaking book, the author provides you with the rare opportunity to understand the logic behind them and make them your own. The rewards of carefully chosen alternative investments can be great. But many investors don't know enough about unfamiliar investments to make wise choices. For that reason, financial advisers Larry Swedroe and Jared Kizer designed this book to bring investors up to speed on the twenty most popular alternative investments: Real estate, Inflation-protected securities, Commodities, International equities, Fixed annuities, Stable-value funds, High-yield (junk) bonds, Private equity (venture capital), Covered calls, Socially responsible mutual funds, Precious metals equities, Preferred stocks, Convertible bonds, Emerging market bonds, Hedge funds, Leveraged

buyouts, Variable annuities, Equity-indexed annuities, Structured investment products, Leveraged funds The authors describe how the investments work, the pros and cons of each, which to consider, which to avoid, and how to get started. Swedroe and Kizer evaluate each investment in terms of: Expected returns Volatility Distribution of returns Diversification potential Fees Trading and operating expenses Liquidity Tax efficiency Account location Role in an asset-allocation program Any investor who is considering or just curious about investment opportunities outside the traditional world of stocks, bonds, and bank certificates of deposit would be well-advised to read this book. We all make mistakes, but imagine losing your financial solvency or your children's inheritance to the failing economy. Buying low and selling higher is the name of the game, but we often do the opposite. As the stock market rises, we remain on the sidelines, watching as others are reaping monetary rewards. We want to rebuild, but we are fearful of losing additional funds in today's risky market. These challenges have plagued investors for decades, many of whom have lost much of their investments in various recessions. Even so, you can transform your investment mistakes into financial gains. Making a comeback from investment errors requires an understanding of some basic elements of investing, such as • predictable investor behavior; • insight from hindsight; • risk/reward consideration; • chance of loss measurement; and • data and analysis. All investors experience the same psychological emotions and are susceptible to making the same investing errors of judgment; thus, the winners and losers are determined by how they play the game. Active managers persistently lag the returns of benchmarks and index funds that track them, with the excuses for underperformance recycled every year. This comprehensive book is the antidote for the active managers' siren song. If you understand the benefits of indexing, or systematic investing, it will reinforce your commitment while increasing your knowledge. If you don't yet believe, Swedroe and Berkin provide a compelling case that you're playing the loser's game of active management. Alpha, or outperformance against appropriate risk-adjusted benchmarks, is shrinking as it gets converted into beta, or factor exposures. They demonstrate that even for the

most talented managers, their ability to add value is waning because: the amount of alpha available is declining; it must be split among an increasing amount of investment dollars; and the competition is getting tougher. In this greatly expanded second edition, Swedroe and Berkin show you how to develop an investment plan that focuses on what risks to take, and how much of them, as well as how to build a diversified portfolio. They present a list of vehicles to consider when implementing your plan and provide guidance on the care and maintenance of your portfolio. As a bonus they add appendices that will make you a more informed and, therefore, better investor. This makes *The Incredible Shrinking Alpha* a complete guide to successful investment strategy. Bedrock investing principles for profiting in today's shaky markets If you wanted to create the next earth-shattering consumer product, Steve Jobs would be an ideal role model to follow. If you planned to become a great golfer, you might look to Arnold Palmer or Jack Nicklaus. So, if your goals were to outperform other investors and achieve your life's financial goals, what should you do? Think, act and invest like the best investor out there: Warren Buffett. While you can't invest exactly like he does, *Think, Act, and Invest Like Warren Buffett* provides a solid, sensible investing approach based on Buffett's advice regarding investment strategies. When it comes to investing, Director of Research for the BAM Alliance and CBS

News blogger Larry Swedroe has pretty much seen it all—and he's come to the conclusion that simple is better, that adopting basic investing principles always increases an investor's chance of success and that Buffett is the perfect model for such investing. In *Think, Act, and Invest Like Warren Buffett*, Swedroe provides the foundational knowledge you need to: Develop a financial plan to help you make rational decisions on a consistent basis Determine the level of risk that's right for you and allocate your assets accordingly Create a strong portfolio that will weather any economic storm Manage your portfolio—rebalance periodically to maintain proper risk levels The beauty of the Buffett approach is its profound simplicity: follow the basics, keep your cool, and have a sense of humor. The market volatility of recent years has ushered in armies of economists, forecasters and other so-called experts whose job it is to explain how everything works. Somehow, they have managed to muddy the waters even more. The truth is, investing is easier than you think—even in today's economy. "Complex problems can have simple solutions," Swedroe writes. *Think, Act, and Invest Like Warren Buffett* helps you go back to the basics—so you can leap in front of the investing pack.
